

SAJCD

CPD October 2011

CPD questionnaires must be completed online via www.cpdjournals.co.za.

After submission you can check the answers and print your certificate.

1. **True (A) or false (B):**
The Music Perception Test (MPT) was designed to evaluate rhythm, timbre, pitch and melody.
2. **True (A) or false (B):**
Audiologists can use the MPT as a counselling tool.
3. **True (A) or false (B):**
All participants performed poorly on the rhythm section of the MPT.
4. **True (A) or false (B):**
A variety of tests evaluating music perception in hearing aid users are available.
5. **True (A) or false (B):**
Approximately 15% of individuals with mild traumatic brain injury (MTBI) complain of debilitating symptoms up to 1 year after injury.
6. **True (A) or false (B):**
MTBI will always have a mild impact on an individual's communication abilities.
7. **True (A) or false (B):**
Discourse analysis is a quantitative approach to examine individuals' perceptions.
8. **True (A) or false (B):**
One of the participants in the MTBI study, P1, viewed loss of temper as a form of communication.
9. **True (A) or false (B):**
Irritability and associated loss of temper are always permanent consequences of MTBI.
10. **True (A) or false (B):**
Executive function is associated with the frontal lobes of the brain.
11. **True (A) or false (B):**
Individuals with MTBI do not experience word retrieval difficulties.
12. **True (A) or false (B):**
The terms dizziness and vertigo both refer to exactly the same symptom.
13. **True (A) or false (B):**
Vertigo is a perception of motion when there is an external source for that sensation.
14. **True (A) or false (B):**
The Vertigo Symptom Scale evaluates two areas, namely the experience of dizziness and psychological symptoms.
15. **True (A) or false (B):**
The Afrikaans Vertigo Symptom Scale presented with good sensitivity and poor specificity in relation to vertigo.
16. **Services for people with communication disorders:**
 - a) are often well understood
 - b) are well resourced
 - c) often have low priority in health care systems
 - d) are well established worldwide.
17. **Indigenous knowledge should be used:**
 - a) with caution
 - b) to drive the process of development of contextually relevant resources
 - c) in conjunction with external and scientific knowledge to produce locally relevant resources
 - d) b & c.
18. **Adaptation of a test developed elsewhere:**
 - a) is the best way to develop local assessment resources
 - b) is not necessary when used in another context
 - c) could assist in developing local knowledge and resources
 - d) none of the above.
19. **Studies in the local context are necessary to:**
 - a) determine the prevalence of communication disorders in South Africa
 - b) obtain legislative support for service delivery
 - c) describe the status of services currently available
 - d) all of the above.
20. **Speech-language therapists in public hospitals:**
 - a) fulfil different roles in neonatal nurseries, as determined by their context
 - b) have sufficient time to participate in ward rounds
 - c) are all involved in discharge planning
 - d) all of the above.
